Total Driver Evaluation System: Sponsoring a New Development

In partnership with Griffith University's Behavioural Basis of Health Research Centre, located within the Menzies Health Institute Queensland, Total Driver Australia Pty Ltd is launching an exciting new project to evaluate its Youth Driver Safety Program. Using the expertise of Menzies Health Institute Queensland staff, the proposal targets a continuing program evaluation to develop and maintain the highest possible standard of youth driver training.

Unique features of this program include:

- Consultative access to Menzies Health Institute Queensland staff expertise throughout the program;
- Continuing rigorous research evaluation of the youth driver training program;
- To enhance the validity of the youth driver training program, regular feedback of evaluation research findings to Total Driver Australia Pty Ltd;
- Support from a wide range of stakeholders dedicated to improving driver safety;
- Robust organisational arrangements linking the Driver Development System (training), the Driver Management System (logistics), and the Driver Evaluation System (research).

By joining in the sponsorship of this important new program, you are invited to become a commitment active partner in this unique initiative to improve safety of roads Queensland and Australia-wide.
